

Ector County

West Odessa Water Project

Town Hall #3

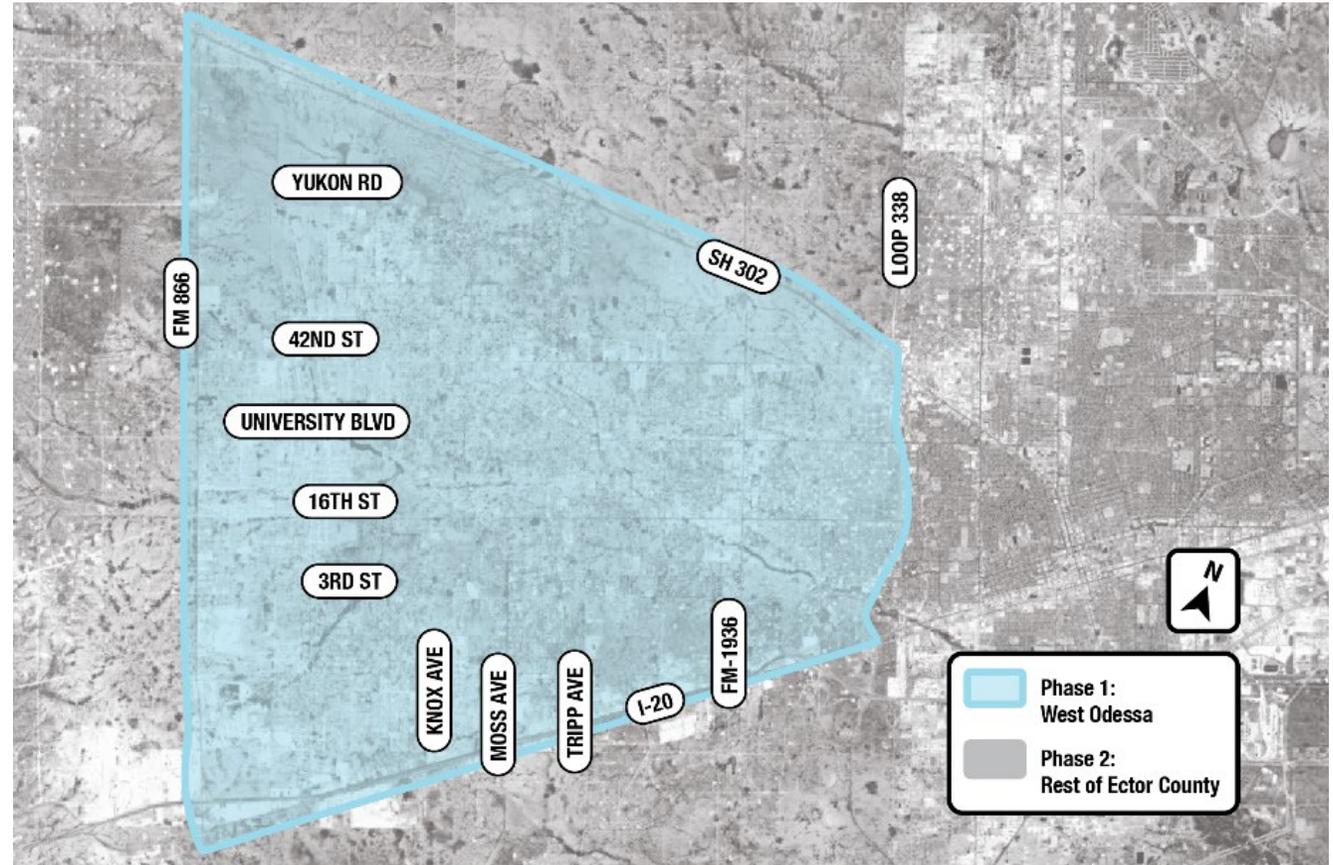

February 4, 2026

What is this Project?

Ector County received \$17 million from the State of Texas to help bring clean water to homes in West Odessa.

Phase 1 will be allocating the \$17 million to the area shown on the right.

Phase 2 will be for all residents in Ector County.

What is this Project?

Everyone in Ector County should answer the project survey, even if you do not live in the ECUD area.

This helps the County learn where people need water for future potential projects.

The goal is to give clean, safe drinking water to people who do not already have it.

All work must be finished by June 2027.
